ENTRIES FOR FAIR MUST BE PUT IN BY AUGUST 12th

Baseball, Racing and Big Midway Attractions at Wetaskiwin Exhibition

The Wetaskiwin Fair is now less than two weeks away, and Manager McHardie and the board of directors are bending every effort toward making it one of the most successful events ever held in Wetaskiwin.

With a big list of exhibits in prospect, both live stock and the other classes, and a varied program of sports and amusements, visitors to the Fair will find plenty to interest and entertain them.

Monday, the 17th, will see the judging of livestock and other exhibits, which will commence at ten o'clock in the morning.

Tuesday, the 18th, will be Kiddies' Day, when all the youngsters in Wetaskiwin and district are invited to be the guests of the local Elks' Lodge, with free lunch on the merry-go-round, free ice-cream and free lollipops. It should be a great day for the kids.

The Conklin & Garrett, All Canadian Shows will be on hand every day, with seven side shows, numerous concessions and three rides, merry-go-round, ferris wheel and chairplane.

A good program of sports is being arranged by the committee, which will include baseball, relay races, running races, Indian races, Squaw races, and chariot races. Five or six teams are expected to compete in the baseball tournament. Watch for the detailed sports program in next week's paper.

Entries for the fair are now coming in at the secretary's office, and intending exhibitors are again reminded that all entries must be in the secretary's hands not later than August 12. Get yours in early and avoid the rush.

SWEDISH BAPTISTS HOLD CONFERENCE

The Swedish Baptist Conference of Alberta met July 30 to August 2 at Water Glen church. This is an annual gathering that meets at a different church each year for the purpose of discussing various problems and laying plans for the coming year. The following officers were elected for the year: President, Rev. P. M. Meyer, Wetaskiwin; vice president, superintendent of missions in western Canada; Rev. J. Paul Erickson, Edmonton; secretary Alberta Missionary, Rev. O. Larson, Camrose; treasurer, Mrs. J. Paul Erickson, Edmonton.

Throughout the conference a very good spirit of brotherhood and Christian love was manifested. Plans were laid for greater service for the great cause for which the church stands.

One of the resolutions accepted with enthusiasm was as follows:

"Whereas the liquor interests here have used their influence to such an extent that the sale of spirits liquor has again become an actual fact within our province, although under government restrictions, it is resolved that we urge upon our own people and all whom we can in any way influence, to do all in their power to support every effort made to abolish the manufacture and sale of all intoxicants in the province of Alberta and the Dominion of Canada."

VOTED ON LOCAL OPTION

Local option votes to decide whether to sell beer shall be granted in certain localities, have now been held in eight communities in the province, and five more have petitioned for votes.

The following communities have held votes, and the results were as follows:

	Dry Wet
Bentley	74 23
Cayley	40 10
Galahad	26 25
Irma	55 11
Islay	37 33
Ohaton	13 14
Parkland	159 102
Sturgeon	443 492
Totals	847 713

DUHAMEL WINS U. F. A. TROPHY

The final game in the U.F.A. league was played on the Wetaskiwin diamond on Tuesday evening between the Duhamel and Bear's Hill teams, and proved to be a walk-away for the aggregation from Duhamel. Olson, the husky twirler for the winners had good control and struck out twelve men in the seven innings played. For Bear's Hill, E. Child pitched the first three innings very effectively but was given poor support, and J. Hodson did the hearing for the remainder of the game, but he evidently had an off night. Heavy slugging was the order, and the score being 18-2. They therefore won the championship, and have been given the custody of the trophy until next season.

The following was the line-up: Duhamel—W. Olstad, c; Gouchee, I.B.; Mambrey, 1b; A. Sharkey, 2b; Yates ss; C. Olstad, p; Mulcahy, H.; Sharkey cf; Wylie rf.

Bear's Hill—Hudson, 2b and p; Bergen, E.; Child p; 2b; Fonteyne, J.; Kraemer ss; J. Shell, 1b; P. Kraemer 1b; S. Shell rf.

Umpire—P. Ryan.

BY-ELECTIONS IN ALBERTA PUZZLING FARMERS' CABINET

Edmonton, Aug. 3.—Because of numerous members of the Alberta legislature, who either have been nominated or may be nominated to run in federal ridings of the province at the forthcoming Dominion election, the subject of holding by-elections to fill their places in the legislature is occasioning not a little anxiety to the Farmer government. Under the recent Election Act of Alberta, a seat in the house, vacated by a legislator, must be filled within 120 days of his resignation.

If a federal election is called in the near future, which everyone seems to regard as a foregone conclusion, the government will be faced with some disagreeable alternatives. Either a flock of by-elections will have to be called just prior to a general provincial election, or else a number of constituents will have to go without representation during the early session of the house in 1926. This is the only other way out would be to amend the Election Act again, extending the period of vacancy. None of these contingencies is pleasing to the government.

A communication was read from the field crops branch of the department of agriculture, respecting the showing of pictures to encourage and illustrate the destruction of noxious weeds. It was moved by Coun. Maynard that the pictures be shown during the fair, if the dates are convenient to the department.

J. K. Juester complained about the Sow and Canada thistles being allowed to grow about forty rods south-east of the oil tanks and going from there southeast to Court House Avenue. It was moved by Coun. Shantz that this council request the city of Wetaskiwin to take the necessary action to have these removed.

It was moved by Coun. Shantz that the bills and paychecks be passed for payment, after which the meeting adjourned.

BINDERS HUM IN ALBERTA, MANITOBA

Winnipeg, Aug. 4.—Wheat is being harvested all over southern Manitoba and Alberta. For three days the weather has been intensely hot. The machines are in the field through most of those two provinces south of the C.P.R. main line. Little if any rust-damaged grain has been discovered.

Some sawy-fine damage is reported in Saskatchewan fields but none in Manitoba.

In most cases the heads are filled out, well and the berries are large and of fine color. Many fields are averaging thirty bushels per acre along the southern sections close to the United States border. By Saturday, cutting will begin through northern sections of these two provinces and the harvest will be general ten days earlier than usual, due to the heat waves.

In spite of terrible weather reports do not indicate that the grain has suffered from drought or heat.

FORTY-SIX FIRES RAZE IN KOOTENAY

Nelson, B.C., Aug. 4.—Forty-six fires in the West Kootenay were started by the electrical storms of Saturday night that was general over the district, though not much rain fell. Seven of these fires were on Kootenay Lake, 12 in the Slocan Valley, five in the Salmon Valley, four on the lower Arrow Lake and six on the Upper Arrow Lake, the forest branch states.

Two of the fires are receiving much attention, 42 men being sent out from Nelson Monday to one on Evans Creek, near Sloan City, where there are important lumber operations, and 35 leaving Monday night for Nakusp, where there was the first fatality of the season Sunday night.

HAUL DAMAGES CROPS IN VICINITY OF SASKATOON

Saskatoon, Aug. 4.—Heavy damage to crops was done at 9:30 Monday evening by half which fell in the Edam district. The ice stones for fifteen minutes over a considerable area around the town.

Look at your label to see if your subscription is paid up.

90,000,000 WHEAT YIELD

"About 90 million of bushels would be my estimate of the wheat yield in Alberta for 1925, judging by the outlook at the present moment," declared John I. McFarland, president of the Alberta Pacific Grain Company to the Calgary Herald, on Tuesday morning.

Other clauses of the proposed agreement set forth for the following proposals:

The province agrees to satisfy any claims of the Hudson's Bay Co., entitled to be put forward in respect to public lands, out of such public lands administered by the province, in the same way, the province agrees to satisfy any claims lawfully put forward by or on behalf of grantees of land by way of subsidy for the construction of railways or otherwise in ac-

cordance with the provisions of any statute of Canada.

Under the agreement the Dominion will transfer to the provincial money or securities constituting school lands funds, so far as the fair is derived from the disposition of any school lands within the province. The interest of the Dominion of Canada in the waters of the province shall continue to be vested in the crown and administered by the government of Canada for the purposes of Canada.

All rights of fisheries, however, except those specifically excluded in the agreement, shall belong to and be administered by the province, which may dispose of them by sale, license or otherwise, subject only to the legislative jurisdiction of the parliament of the province.

All lands included in Indian reserves within the province, including those selected and surveyed but not yet confirmed, shall continue to be vested in the crown and administered by the government of Canada.

The province agrees to satisfy any claims of the Hudson's Bay Co., entitled to be put forward in respect to

public lands, out of such public lands administered by the province, in the same way, the province agrees to satisfy any claims lawfully put forward by or on behalf of grantees of land by way of subsidy for the construction of railways or otherwise in ac-

cordance with the provisions of any statute of Canada.

The province will from time to time upon the request of the superintendent of Indian affairs, set aside out of accepted lands transferred to the province, such further areas as necessary to enable Canada to fulfill its obligations under the treaties with Indians of the province.

To all treaty Indians the province assures the right to hunt and fish on all unoccupied crown lands.

The British Empire is the world's greatest diamond producer; the Cape province in South Africa alone is.

The general meeting of the members of the provincial live stock pool will be held in the U.P.A. hall here on Monday next, August 10, at two o'clock, for the purpose of forming a local live stock association, in connection with the pool. Officers will be elected and other important business will be transacted. The delegates to the live stock convention held on August 4th, will give a report.

There is already a larger membership in the pool in the Wetaskiwin district, and the local branch should prove to be of great benefit to the live stock producer. The owners of live stock in this community, who have not already joined the pool are invited to attend the meeting, as well as all others who are interested in the welfare of the farmer.

THE WHIR OF WINGS

(Continued from last week)
 Again the information Kid learned something from Dusty's sister.
 "She misses her mate," explained Miss Brown. "When pigeons are permitted to make pigeons of their own selection, they remain faithful to the one companion until death."

"Well, you've got to hand it to 'em" answered the Kid. "Too bad you can't put Helen in a stable entry and let her fly for your money."

He was thinking of Miss Brown's equine contortions, who had not succeeded in reducing Dusty's debts to any appreciable extent.

A sort of armed neutrality now existed between old man Benson and Miss Brown. He still felt that a race-track was no place for a woman, but he no longer projected openly; he no longer spoke about shipping to Canada.

He seemed willing to let Miss Brown continue to mind her own business. He even went so far as to commit himself to a nuclear grant when they passed each other no times on the narrow path that led up the hill.

The information Kid, watching developments, became aware that something had gone wrong with Advance Guard. The grand old king of the bunch was not himself. Old man Benson, in a shaky voice, admitted as much. "First time I ain't been able to help him, Fib. Don't know what's wrong, and the track veterinarian can't dole it out either. The horse ain't stepin' in a month."

"How do you know, Benny?"

"Tell by his breathing. I put down fresh straw every night, and in the morning it's just the way you see it now."

The hustler looked down and noted that the floor of the stall was covered with straw that had been chopped fine by the restless tread of hoofs. He knew what that meant.

"You're right, Benny. He's gotten to be a night-walker, and that means there's something troubling him. He's nervous; there's somethin' on his mind. Are you sure he ain't lonely?"

Benson was indignant. "Lonely? Lonely? Why, he's got me, ain't he?"

The young hustler grimmed and lit a cigarette. "Well, he's got you, Benny; that's what made me think he might be lonely. Now, don't get excited, pal! I'll explain—"

"No, you won't," said Benny. "You won't explain anything. You're one of those fresh young guys that go around advertising their ignorance. Never owned a horse in your life, and try to tell me what's the matter with mine?"

Do I look like I'm lonesome? Well, if I ain't, why should the horse be? Ain't we lived together, and eat together, and slept together, and travelled all over the country together? I'm still here, ain't I? Then—why, my dog eats?"—get out of here, or I'll brain you with a bucket!"

The information Kid bowed with exaggerated politeness. "Allah bless and keep you!" said he. "My bunch was right. Both you and the horse means the same thing. The only difference is that old Snowface has sensed it first. You're still running in bluffers. Now, Benny, see you again sometime."

He sauntered away, shaking his head dubiously.

At the lower end of the avenue of stalls, the youthful knight of the betting ring paused for a hocky look. He saw the tense, angular figure of Miss Brown leaning Princess into the sunshade under a spreading bush. Not twenty feet away, old man Benson was waiting to advance. Guard; he was a tall, good-looking and trim middle-aged gentleman, keeping their backs to each other, silent, suspicious, resentful, performing the functions of half a mad and vulture to a pair of equine rivals and breeders.

Old Snowface was submitting apathetically to his master's touch. The thermograph seemed to have lost interest in the sport he had traced so far. But suddenly he quickened to life. Up comes the famous golden head with its white blaze; and sensitive ears flared alertly forward; and sensitive Guard stood in attention.

The information Kid caught the whir of wings, and looked up. A miniature aeroplane, propelled by the puffs of lavender, sped by, wheeled and floated down to its empty cote. Helen of Troy rested there a moment and then fluttered to the roof of Advance Guard's stall. The crippled little wimpy sounded a timid appeal; "Currah—Currah—Currah."

Snowface moved forward a step. "Whoa!" said old man Benson. "Did I tell you to move? What's got into you?"

The information Kid laughed and said, "I'll tell you to move."

"Whoa!" said old man Benson. "Did I tell you to move? What's got into you?"

The information Kid laughed and said, "I'll tell you to move."

"Whoa!" said old man Benson. "Did I tell you to move? What's got into you?"

The information Kid laughed and said, "I'll tell you to move."

"Whoa!" said old man Benson. "Did I tell you to move? What's got into you?"

The information Kid laughed and said, "I'll tell you to move."

ship in the history of Fryngalan hill, and naturally the residents were slow to recognize it. Even the information Kid was not certain. He knew, however, that something was in the air.

Benny Benson, who used to guard his roof with safety pins, had opened a bank account for this first time in his life. He had acquired a safety razor, a second suit of clothes, and an unmistakable air of importance. This last was reflected principally in his attitude towards Dusty's sister. Dusty himself would hardly have had the temerity to be so domineering. Old man Benson strutted around like an offish rooster. A dozen times a day he crossed to what had once been forbidden territory and proceeded to lay down the law.

"Now, see here, Matilda, you mustn't put that horse up yet. He ain't cooled out. And look at the bandages! Didn't I tell you to let me do that? Didn't I? Dog my cats, Matilda, if that ain't just like a woman! Gimme that bandage, and you go and sit down."

The amazing thing was that Miss Brown stood for it. Her military was gone. Dusty's sister had grown soft-eyed and timid.

Henry the Rat had gloomy forebodings. "I think there's going to be a murder round here, Kid. Old man Benson don't do nothing any more. He's been a good man, but he's not the kind that responds to punishment, but I don't see 'em 'on down' the hill together a little while ago, and it took him to kill him, and he was gettin' ready to kill him all over."

The information Kid shuddered and then grew serious. "So long as the blower and the horse don't break, we're all right. Advance Guard has been assigned top weight in the Closing Day Handicap. They're going to ask the old boy to carry a hundred and twenty-eight pounds for a mile and a quarter."

"One hundred and twenty-eight!" gasped Henry. "That's charity for you. Why don't they put the grandstand on his back and the up one leg? Somebody must be sick of seeing that old horse come down in front. He ain't goin' to start, is he? What?"

"Sure is," confirmed the Kid, "and that's more, he'll carry every cent the old man's got. Benny's been pointin' for that race all year, and he can't afford to back out now. He's been racing his horse into condition for one event, and if he wins it, I wouldn't be surprised to see him ride."

"Yes, but a hundred and twenty-eight pounds?"

"Heh, that makes it look bad. Still that horse has been running ten points above his normal rating, and I'd hate to bet against him. Seems like that pigeon had lent him wings."

But a bomb-shell exploded one morning among the rail birds who were clocking early workouts. French Bouville hurled it.

"Miss Brown went north last night and took her pigeon!"

"What?"

"I tellin' you somp'n! She paid up the last of Dusty's debts, sold her horses, and told old man Benson he was right—a woman didn't belong on a race track. Spike! Dressed Charley says she took her pigeon and went away cryin', and Benny just stood there, rubbing his head, and lookin' like somebody had hit him with an axe."

Henry the Rat squealed shrilly. "Darn! I tell you it was on 'em!" The lady pulled the hit and run. Benson had to admit to him, if you ask me, if he'd treated to Italy?—the horse treated the pigeon, everything would be a heap like."

Long Shot Murphy agreed to this, but insisted that Miss Brown had no right to take away her pigeon. Henry was silent by Henry.

"It was her right, wasn't it. You don't think I would give the lady her pigeon, do you?"

The information Kid had to part in the argument. He thought he knew what had prompted Miss Brown to run away. He even fancied a wild guess as to what she might put

in the history of Fryngalan hill, and naturally the residents were slow to recognize it. Even the information Kid was not certain. He knew, however, that something was in the air.

Benny Benson, who used to guard his roof with safety pins, had opened a bank account for this first time in his life. He had acquired a safety razor, a second suit of clothes, and an unmistakable air of importance. This last was reflected principally in his attitude towards Dusty's sister. Dusty himself would hardly have had the temerity to be so domineering. Old man Benson strutted around like an offish rooster. A dozen times a day he crossed to what had once been forbidden territory and proceeded to lay down the law.

The information Kid laughed and said, "I'll tell you to move."

"Whoa!" said old man Benson. "Did I tell you to move? What's got into you?"

The information Kid laughed and said, "I'll tell you to move."

VANCOUVER MARKET APPEARS INEVITABLE

Vancouver, B.C., Aug. 1.—With the shipping permit system removed and with Vancouver elevators thrown open to receive grain without restriction, as announced yesterday in Winnipeg by the railway companies, creation of a cash and futures grain market in Vancouver, functioning as in Winnipeg, is regarded as inevitable. It was stated here last night.

Storage of unseeded grain in local elevators by prairie farmers, it is expected, will make possible the functioning of an active exchange in Vancouver, quoting to the trade a Vancouver price which will fluctuate on basis of supply and demand independently of Winnipeg.

Advantage of the new regulation effected by the railways lies in the fact, it is said, that the western route will be available for use by private shippers as well as by large companies.

IN DARKEST AFRICA

A young man had a fine collection of East African trophies, and among them was a splendid buffalo head.

"What a wonderful head!" said a girl who had come to inspect them. "How did you get that? Was he very savage?"

"I had a ducie of a time with that buffalo," replied the hunter. "Never had such a morning in my life. I shot it in my pyjamas."

"Good heavens!" murmured the sweet young thing. "How did it get there?"

Then the information Kid shuddered and then grew serious. "So long as the blower and the horse don't break, we're all right. Advance Guard has been assigned top weight in the Closing Day Handicap. They're going to ask the old boy to carry a hundred and twenty-eight pounds for a mile and a quarter."

The information Kid shuddered and then grew serious. "So long as the blower and the horse don't break, we're all right. Advance Guard has been assigned top weight in the Closing Day Handicap. They're going to ask the old boy to carry a hundred and twenty-eight pounds for a mile and a quarter."

The information Kid shuddered and then grew serious. "So long as the blower and the horse don't break, we're all right. Advance Guard has been assigned top weight in the Closing Day Handicap. They're going to ask the old boy to carry a hundred and twenty-eight pounds for a mile and a quarter."

WAS THREE YEARS OVERSEAS

Wounded, Gassed and Shell Shocked

Mr. W. G. Trenholm, Southampton, N.S., writes to the Times from the front with the Canadian Expeditionary Force, and was wounded, gassed and shell-shocked and my nerves were lost in a very bad condition.

After coming home I had a rest for some time, and my nerves seemed to be better, but as soon as I started to work again, they got bad again. I thought I would have to give up my position as a rotary surveyor.

Why, whenever I saw a knothole in a knot, I would hit it hard in a log I would get so nervous I would break and start to tremble, and after a while I would hardly sleep at all.

A friend advised me to try

MILBURN'S Heart and Nerve Pills

which I did with the following effect:

I can eat all day long, and no matter what the saw hits it doesn't affect my nerves at all, and I can also sleep well at night.

Milburn's Heart and Nerve Pills are made only by the T. Milburn Co., Limited, Toronto, Ont.

THE TRUCK FOR THE FARM

There are three big factors that are going to determine your future this year—the nature of your crops, the cost of production and your marketing facilities.

We wish to emphasize in this message how completely the success of your entire year's efforts depend upon efficient, economical transportation.

With the Ford Truck you can reach better markets. You can make two trips to market in less time than you could one with a team and with less expense.

We will be glad of an opportunity to discuss your haulage problems with you in detail at your convenience, we will bring a Ford Truck to your farm for a demonstration under actual working conditions. There is no obligation attached to this offer.

THURSDAY, AUGUST 6, 1925

Make Wetaskiwin Fair a Success!

The Wetaskiwin Exhibition will be held on August 17th, 18th and 19th, and the officers of the association respectfully request the general public to make the fair a banner one this year. Many plans are being made in the preparation, and it remains with the citizens to make the Wetaskiwin Exhibition one of the best in the province. We have an agricultural district second to none in Alberta, and if the best product of the farm are entered in competition, it will be surprising what a magnificent collection we will make.

The success of the Fair is assured this year if the right interest and cooperation are taken. If the farmers do not take an interest in THEIR Fair, and bring in the exhibits of live stock, grains, vegetables, etc., etc., and if the ladies of the community do not exhibit their best specimens of fancy work, their best cooking, canned fruits, etc., the exhibition cannot be anything but a failure. The success of the Fair depends upon the amount of cooperation received from the people of the adjoining country and the citizens of Wetaskiwin. The Fair is primarily for the farmer, and its success or failure rests entirely with the farmer.

The sports committee are working hard to provide entertainment for all. A baseball tournament is being arranged, as well as horse races, and other forms of sport. The Conklin & Garrett Shows will provide midway and grandstand attractions second to none in western Canada, where old and young may enjoy the different forms of amusement. Therefore, those who are looking for pleasure will be disappointed.

Another big attraction will be Kiddies' Day, when the local Elks' Lodge will provide treats of different kinds for every kiddie at the Fair.

Therefore, The Times urges all of its farmer readers to take an active interest in the Fair this year. Get your best exhibits ready and make your entries early. A little cooperation and assistance on the part of everyone will make the Wetaskiwin Exhibition a success, and will be the best publicity the district can get.

And in addition to bringing in the exhibits, arrange to have the family come to the fair and enjoy a holiday.

Where is Premier Greenfield?

When the Royal Grain Commission was sitting in Vancouver last summer, there was a great deal of fuss made by the Greenfield government, represented by Mr. Van Allen, over the charge of five cents per ton wharfage. This year Alberta had a crop of over 100,000,000 bushels of wheat. This year it should have the same.

But why should Premier Greenfield's government get excited about a charge of five cents per ton and overlook altogether the loss to the Alberta farmer of 100,000 bushels on Vancouver wharfage amounting from five to ten cents per bushel?

On October 30th, 1923, Alberta's wheat was selling on the Liverpool market at \$1.52 for 1 No. Northern, the Fort William price was 97 cents, a spread of 54 cents. On March 29th, 1924, Alberta wheat was selling in Liverpool at \$1.37 for 1 No. Northern, the Fort William price was 96 cents, a spread of 40 cents.

The Vancouver price is always five to ten cents over the Fort William price, but the Fort William price, not the Vancouver price, is the one paid to the Alberta farmer.

These Fort William figures, less the rail freight, represent a spread between the Liverpool price and the price paid the Alberta farmer, ranging from 40 cents to 70 cents a bushel. Surely it does not cost that much money to handle a bushel of grain from Alberta to Liverpool.

What, then, is Premier Greenfield doing to reduce this spread? What stand did he take on the iniquitous "permits" system against Vancouver? What is he doing today to secure Crownest grain rates westward? Are his sentiments in favor of or against the people of the Peace River getting a coast outlet? Will he hinder or help the establishing in Vancouver of a cash grain market for the Alberta farmer?

Some hard work by Alberta's Premier could secure for the grain grow-

ers another five to ten cents per bushel. And the Alberta farmer, not the Vancouver grain dealer, is the man who is going to get that five or ten cent premium on Vancouver wheat.

But if the Alberta farmer wants to enforce his right and collect his money, Premier Greenfield will have to get busy—Vancouver Sun.

Cause of Poor Exam. Results

The average of intelligence in children of school age remains about the same, year in and year out. The average of industry remains about the same. And the average of teaching ability does not vary from year to year.

Then if there is a high number of failures in school examinations, to what must the result be attributed?

Either that the examination papers have been set at too high a standard, or that the examiners are too severe in marking papers. There is no other answer.

When Dr. Scott says, regarding the Grade XI results, that they were not as good as he expected, it can mean only one of two things; either the papers were too severe, or the examiners who marked the papers were too critical—Calgary Herald.

Taking A Vacation

If you are thinking of economizing this year by going without a vacation, think it. "To go without would end cost you many times more than to take one."

There is one thing a vacation gives which is all need in order to keep fit—a change of our daily routine—change of air, change of scenes of food, of our physical and mental environment. It doesn't matter whether you live in the city or in the country you need it to keep you alert, alive, at your best. You need it to perk you up.

If you take a couple of weeks off now, in the play time of the year, you will never regret it. It will prove you one of the best investments you can possibly make, and will bring you immediate return. If you spend your vacation in the right way, you will add to the reserve in your health bank a new store of energy that will make you equal to any emergency that may arise. You will come back a new being ready to resume your part in the life game, with vigor, courage, self-confidence, and a new sense of power.

So says Dr. Marden. What about it?

Credit Where Due

The Alberta government has been subjected to no little criticism during the few years it has been in office and certain ministers have been singled out personally for uncomplimentary remarks from press and platform. No doubt some of this criticism has been justified, but just as surely as deserved criticism is fair, so is it fair to give credit when and where credit is due.

The Herald takes pleasure in tendering to Hon. George Hoadley, minister of public health, its sincere congratulations upon his recent decision to provide insulin to all patients in this province who cannot bear the full cost of providing it for themselves. No more humane step has been taken by any minister of this department in the history of the province, and this paper has no fear of such statement being successfully contradicted.

It is unnecessary to enter into a long discussion as to the merits of insulin. Nearly everyone who reads, knows that insulin was discovered only a little over three years ago, and that it is today the only known successful remedy for Diabetes. It is recognized throughout the entire civilized world as the one and only remedy which can positively keep under control one of the most fatal diseases the world has known.

Insulin was at one time so expensive that only the rich could afford to take the treatment. As the process of manufacture was perfected, the cost was gradually reduced until the man or woman with a fair income could finance its purchase. But even

then, the Fort William figures, less the rail freight, represent a spread between the Liverpool price and the price paid the Alberta farmer, ranging from 40 cents to 70 cents a bushel. Surely it does not cost that much money to handle a bushel of grain from Alberta to Liverpool.

What, then, is Premier Greenfield doing to reduce this spread? What stand did he take on the iniquitous "permits" system against Vancouver? What is he doing today to secure Crownest grain rates westward? Are his sentiments in favor of or against the people of the Peace River getting a coast outlet? Will he hinder or help the establishing in Vancouver of a cash grain market for the Alberta farmer?

Some hard work by Alberta's Premier could secure for the grain grow-

Here and There

Conditions in the fruit areas of British Columbia are reported as satisfactory. Weather conditions have been good and the trees are healthy.

According to recent reports general conditions in the Maritime Provinces are normal. Potato production is about complete. Trees in the Annapolis fruit districts are in good shape and estimates point to a normal crop.

A consignment of lumber from South Westminster, B.C., arrived recently at Dorval, Quebec, on the Canadian Pacific lines, consisting of twenty-nine logs of Douglas Fir, some of which were so long that three flatcars were required to carry them.

Field Marshal Earl Haig and Countess Haig travelled through western Canada to the Pacific coast over the Canadian Pacific Railway recently, after attending the conference of the British Empire Service League at Ottawa.

"Western Canada has never had better crop prospects than which exist now," stated Ernest G. Cook, of E. Cook, Ltd., Crop Insurance Co., of Moose Jaw, Sask., who recently spent two weeks at Baffin after touring the West and studying crop conditions.

According to "Agricultural and Industrial Progress in Canada" the Department of Trade and Commerce has issued the following comparative statement for 1924 and 1925 trade in the Dominion:

Total 1924 1925
Trade \$1,902,130,164 \$1,878,294,180
Imports... 893,466,567 796,932,537
Exports... 1,058,763,297 1,081,361,643
Fav. Bal. 165,506,430 234,429,103

According to the Dominion Bureau of Statistics the annual consumption of standing timber for use, amounts to about 2,600,000,000 cubic feet. The loss by insects and fungi about doubles this depletion, and it is estimated that Canadian forests are depleted at the rate of upwards of five and a half billion cubic feet per annum.

For the first time in the history of Canada, underlings of three provinces and Montana journeyed to McLeod, Alberta, early in July, and held an all-Indian celebration and formed a league of plains Indians. Five thousand white people attended the ceremony and watched the Indians stage their spectacular mounted war-dance.

Deep gratification is felt in Canadian Pacific Railway circles over the receipt of the following cablegram sent to President E. W. Beatty by His Royal Highness the Prince of Wales—"Umtunya, South Africa, July 2nd—Have just heard of Mr. Howard's death. Please convey to relatives my deepest sympathy. (Signed) Edward VIII. The late Mr. W. B. Howard, twice in charge of the Prince of Wales' train when His Royal Highness travelled over Canadian Pacific lines.

For the second time in the history of the newspaper industry, Canadian output has run ahead of that of the United States. During the month of May Canada produced 13,913 tons of newspaper, as compared with 12,926 tons in the United States. The cumulative production of Canadian mills for the first five months of the current year totals \$22,335, which favorably compares with a production of \$22,034 in the United States during the same period.

at the present price of insulin the drain on one's earning power is a heavy one, as the expense is perpetual. The victim of Diabetes, who uses in-

PIMPLES UNSIGHTLY BOILS PAINFUL BOTH ARE CAUSED BY BAD BLOOD

When pimples and boils appear on the face and body it seems as if the skin were the seat of the trouble, but the seat of all diseases lies in the impurity of the blood, therefore you must get under the skin; get the blood and purify it.

Burdock BLOOD BITTERS

goes directly to the root of the disease and restores healthy, normal action to the different organs, and cleanses the blood of all its impurities.

The standard of Quality for over 50 years

sulin, must keep up the treatment until death relieves him of his suffering. Its discoverers have never claimed it to be a cure. It is only a palliative, and keeps the disease under control just as long as it is faithfully used.

The reader can now see that a sufferer from this dreaded disease is under a heavy financial strain throughout his life, if he undertakes the only known successful treatment for his trouble. Insulin, the hope of the diabetic, has been beyond the reach of the poor of Alberta, until the present time.

With the department's announcement that insulin will hereafter be supplied to all persons whose circumstances are such that it would be a hardship for them to pay the full cost of that serum, many sufferers are as-

sured of relief from their sufferings. These men and women can make comfortable, and those who might eventually become charges upon their respective communities may be made self-supporting individuals.

The Herald is particularly interested in the action of the department, as it took a very active part in calling attention to the necessity for such a step, and the wisdom in taking it promptly. We know the necessity, and appreciate the importance of Hon. George Hoadley's merciful provision.—Hanna Herald.

Newspaper Advertising

Newspaper advertising is an accurate barometer of the progressiveness and enterprise of the community. The enterprise of the individual merchant may also be measured by the extensiveness and quality of his newspaper advertising. The prosperity of the community depends upon the prosperity of its business and the prosperity of any business depends in a great part upon its advertising. Merchants long ago learned the wisdom of inviting the buying public into their stores. From the merchant's experience communities have learned the value of inviting strangers to visit them. Through advertising the mer-

chants and communities have succeeded in attracting buyers and visitors. To succeed in business one must have more than just something to sell. He must let the buying public know what he has for sale. Here again the community has learned something from the merchant and invites new citizens by apprising them of what it has to offer. But from the community the merchant has learned one of the secrets of advertising. The city or town seeking to expand its business and increase its population does not confine itself to praising one of its many civic achievements or institutions. It advertises them all. So the business man knows that, while his small ad. in the newspaper will be read and bring him its full share of news business, the large display advertisement will bring him more buyers.—Ex.

M. D. BIGSTONE
SELLS QUARTER

The regular meeting of the council of the Municipal District of Bigstone was held at Lone Ridge hall on July 29th last, with J. L. G. Ratray, reeve, and Councillors Hibak, Ratray, Olson, Arnold, Burleigh and Westendorf present.

On motion of Conn. Olson the minutes of former meeting were read and adopted.

R. E. Flathers offered to purchase the S.W. 10-47-27 on the following terms: \$25.00 down, \$50.00 on October 10, 1925, and \$25.00 on December 31, 1925, \$100.00 at end of 1926 and balance at end of 1927. Interest at eight per cent to be paid on the sum of \$180 from date of purchase until paid in full. It was moved by Conn. Burleigh that the offer of R. E. Flathers be accepted.

A. W. Mattern and L.L. Wood applied for approval of restaurant license at Mac-Mo-O Beach. It was approved by Conn. Olson that above application be approved.

Conn. Hibak reported that the party with whom Isaac Peter had been boarding was unable to take care of him any longer. It was moved by Conn. Olson that Conn. Hibak be authorized to look into the matter and act.

A letter was read respecting case of relief to an indigent in the municipality. The letter was filed.

A letter was read from Louie Larson regarding purchase of N.W. of 22-45-28-th. The secretary treasurer was instructed to write Mr. Larson stating the terms on which this land will be sold.

The secretary treasurer was instructed to obtain advice as to the liability of the council in regard to constructing culverts at approach to private roadways.

Bills and paystsheets were passed for payment of motion of Conn. Arnold and Burleigh.

WILL KILL ALL LIFE
WITHIN 20 MILES

San Francisco, Aug. 1.—Demonstration of a destructive force which he has invented will be carried out on a United States battleship off the coast of California, Dr. Edwin R. Scott, of Detroit, has announced.

Dr. Scott, who is said to have sold the French government the "Killsite" artillery shell during the world war, calls his new munition the "Death Strike." He claims that it will kill life which it comes in contact with within a radius of twenty miles. The naval demonstration will take place within two months, the Detroit inventor said.

GOVERNMENT ADVICE
ABOUT STINK WEED

The following letter, from the department of agriculture, received by Mr. N. Linden, wood inspector for this community, will be read with interest by the farmers of the Wetaskiwin district. The stink weed is one of the worst pests in this section of the country, and the farmers should have no time in following the advice given in this letter.

"Dear Sir—Repeating to your letter of the 5th inst., I note what you say regarding Stinkweed. Farmers who have this weed growing in their grain this year should not be required to destroy their crop unless you consider it an unprofitable one, in which case the Stinkweed with the little crop should be cut, raked and burned in the field.

I would strongly urge upon the public the advisability of fall discing to cover the stinkweed seeds and induce germination in the spring of the year. As you well know, these weeds will very readily appear on account of their being a winter annual. Then they should be disced to destroy them and to get other seeds to germinate.

Then about the middle of June or the 1st of July, plow six to seven inches deep and immediately work down with a harrow. This will destroy standing plants and bring to the surface other seeds which will germinate. Keep the summer fallow black for the rest of the year with the use of a duck foot cultivator or road weeder. If any stinkweed plants are left after cultivation they should be hand pulled and burned. Never allow any of the plants to form even a small green pod, because no matter how small the seed within the pod, it will, if lying around, mature and grow.

With regard to stinkweed which will be in straw after threshing in infested areas, I would require the straw to be fed on the field where it stands, not allowing livestock to tramp over other areas. Unless this is done I would require the straw to be burned at once. Under no circumstances permit straw to be drawn away from one place to another. This is one of the best methods of scattering the seeds.

Where stinkweed is found growing on roads or in patches, it is a good plan to cover with straw and burn the whole thing. This is better than cutting and raking as the latter operation shells out a large percentage of the stinkweed plants.

Harrowing the growing crop in the spring until it is from three to six inches high, will also pull out many of the stinkweed plants. Several harrowings may be necessary and advisable, in which case a slightly heavier seeding may be necessary to make up for the few plants that are destroyed by the process.

W. J. Stephen,
Commissioner

MALMO

A surprise party was held at the home of Mr. and Mrs. P. D. Buckell of the Malmo district, on Tuesday evening, June 27, when the tenth anniversary of their wedding was celebrated. About thirty-five neighbors and friends were present. Mr. Edwin Peterson gave an excellent address and presented the bride and groom with several pieces of cut glass. Lunche was served and a most enjoyable evening was spent.

TOWN TOPICS

Wetaskiwin Fair, August 17th, 1918 and 19th.

Miss Sullivan is holidaying at Calgar, Banff and Lake Louise.

See the big Chariot Race at the Fair. Something new!

An addition is being built to the office of L. H. Newell this week.

Meet me on the Midway at the Fair.

C. H. Russell left for his former home in Exeter, Ont., this week, where he will spend his holidays.

Tuesday, August 18th, is Kiddies' Day at the Fair. Let the Elks give your Kiddies a treat.

Miss Gertrude Thompson is spending her holidays visiting friends at Edmonton.

Mrs. T. C. Rubbra was called to Vancouver on Saturday, owing to the illness of a sister.

How much does your baby weigh? You may have a chance for the special prize at the fair.

Mrs. J. W. Simmers has been holidaying at Calgary and Banff several days of the past week.

Mr. and Mrs. Curt Smith and son are expected home from their trip abroad on Sunday next.

Frank Mikato of Chipman arrived in the city on Monday to renew old acquaintances.

Ald. and Mrs. Gothard, who have been holidaying at Banff, returned home on Tuesday.

The family of W. Barry, who have been spending a month at Pigeon Lake, returned to town on Saturday.

Miss Hincherger left on Monday for her holidays and expects to be away about a month.

Mr. and Mrs. Alex Sims and Mr. and Mrs. T. Bates left on Sunday for an auto trip to Banff, Lake Louise and other points in the Rockies.

The Misses Zita and Angela Weller returned last week after spending a few days with Mr. and Mrs. Frank Hincherger at Hohenmauer.

Mr. and Mrs. Duncan MacEachern motored to Battle Lake on Saturday, where they will spend some time at their summer cottage.

Mr. and Mrs. W. H. Odell and family, who have been spending a month's vacation at Gull Lake, returned home on Saturday.

Leo Vian, Wilfred Vian and Russell Ryan left a few days ago for Saskatchewan, where they expect to work in the harvest fields.

Wm. Kotchin of Edmonton South has accepted a position in R. M. Snyder's hardware store, succeeding Leo Vian, who has resigned.

The families of Mr. and Mrs. J. Johnson and Mr. and Mrs. Jas. Dickson have joined those who are taking a vacation at Pigeon Lake.

Mr. and Mrs. Thomas Lawson and daughters, who were spending a two weeks' holiday at Gull Lake, returned home Monday.

Smith's Variety Store is being remodelled, and in a few days a grocery department will be added to the stock.

The Swedish Lutheran Ladies' Aid meets at the home of Mr. and Mrs. Adolph Peterson, on August 12, at 1 o'clock.

C. H. Russell and R. W. Manley attended the Conservative convention held in Edmonton on Wednesday, as the delegates from the Wetaskiwin district.

Mrs. Chas. Anderson and family of Vancouver, sister of Mrs. A. W. Mattson of Wetaskiwin, left for home last week after spending a couple of weeks here.

Teddy Reynolds has moved his garage from Lorne street to the new location, just east of Owen's Corner, where he is fitting up a convenient work shop and garage.

Prof. and Mrs. Bergsagel and family, who have been visiting at the home of Mr. and Mrs. J. J. Anderson, left for their home at Outlook, Sask., on Tuesday. They are travelling by auto.

Eli Moore left for Spokane and other places at the coast where he will spend a brief holiday. Mrs. Moore and family have been down there for some time, and they will return about the middle of next week.

Archie Roulstone, who is holidaying at Pigeon Lake, has made a reputation for himself as an angler. While fishing one day last week at Battle Lake, he caught a pickerel, which weighed seven pounds. This is reported to be the largest fish of its kind caught this season in either Pigeon or Battle Lakes.

FIRST PAYMENTS
OF WHEAT POOL

From July 15, the date on which the year for the 1924 wheat crop ended, to September 1, when the initial payment for the 1925 crop will be definitely settled, wheat delivered to the pool is being bought on the basis of \$1.00 initial payment. Wheat delivered during this period will be included in the 1925 crop season and if there is a subsequent adjustment in the initial payment, this will be accounted for in interim payments.

BUILDING HOME FOR
COLORED PEOPLE

E. C. Rouce, president of the organization to provide a home for aged people as well as infants and orphans, was in the city the first of the week, and reported having been fairly successful in his canvass for funds. The first wing of the building will be 30x30 feet, and will be ready for occupancy in October. The building is located at Junkins, and will provide accommodation for colored people.

On Saturday afternoon and evening, August 8, the Swedish Lutheran church will hold a coffee and ice cream social on the church lawn. A cordial invitation is extended to all.

The many friends of Byron Hanson are congratulating him upon his success in having passed the violin examination of the Toronto Conservatory of Music. He received word of his success this week.

The Wetaskiwin Boy Scouts are congratulating him upon his success in having passed the violin examination of the Toronto Conservatory of Music. He received word of his success this week.

Are you getting your entries ready for the Wetaskiwin Fair? Help make the fair a success this year by doing your bit. Doing in anything you have worth exhibiting and encourage those who are doing their utmost to put the fair over.

Miss MacCready, the popular teacher of the Anthony Hill district, met with a painful accident at her home on Wednesday of last week when she was kicked by a horse, receiving a fractured collar bone. She was brought to the Wetaskiwin hospital for medical attention.

WATER GLEN

This community is one of the beauty spots of Alberta at this season of the year, as the grain fields and the vegetable and flower gardens are at their very best. One of the finest flower gardens in the province is to be seen at the home of Mr. and Mrs. Shappock, and those who were fortunate enough to receive an invitation from this estimable couple to visit their home on Monday of this week, certainly had a most enjoyable and profitable afternoon. Those present were unanimously of the opinion that Mrs. Shappock has the most beautiful garden they have seen in this province. The arrangements, variety and perfection of the flowers showed skill and very pretty effect. A bountiful spread was served in the hours of the day in the country where there is no night, only a twilight in which it is at all times possible to read a paper. They shot rapidly in flat-bottomed boats at midnight.

The vastness and extent of this enormous country through which he travelled for 1300 or 1400 hundred miles by water greatly impressed Mr. Hutchings. The party travelled for days in the country where there is no night, only a twilight in which it is at all times possible to read a paper. They shot rapidly in flat-bottomed boats at midnight. The difference of the inhabitants of this northern land who goes on in the outside world, struck Mr. Hutchings. He is a man of great radio. Radio has in some measure broken the isolation in which they previously lived, but people who received only two mails from September to June are thrown upon their own resources and become so independent of the outside world as to lose interest in its activities.

Excepting the sisters at the Catholic missions, there are not more than a dozen white women in an expanse of 3000 miles salt. Mr. Hutchings paid warm tribute to the work of the missions, one of which is to be found at almost every Hudson's Bay trading post. They are not only the school where the Indian and half-breed children are taught the fundamentals of civilization, but they are the hospitals where the sick and suffering receive Christian charity and kindly care. There are two Anglican and a number of Catholic missions in the country through which the party travelled.

There is little agriculture carried on in this vast territory whose settlers depend mainly on hunting and trapping for a livelihood. The country is not adapted to agriculture, and its development will consequently be slow. Native development may take place, but the agricultural growth upon which must depend the real opening up will be gradual, in Mr. Hutchings' opinion.

Trapping is the main industry of the country and its business is conducted mostly on credit. The trading companies supply a man with a "grub stake" and he goes off in August or September and does not return until June, when he pays the company with his furs. Of the trading companies told Mr. Hutchings that he found the Indians, half-breeds and trappers very dependent on the whole, and older ones offered less through greater credit. A trapper may take anything from \$2,000 to \$5,000 from his furs in one season.

Prices are tremendously high in the north owing to the difficulties of the transportation. Bacon sells at Fort Smith for \$1 a pound, eggs for \$1 a dozen, flour at \$1.50 to \$2 a sack and fresh beef from 22 to 25 cents a pound.

There is little fresh beef sold, except to the boats which ply on the rivers, and people on the country subsist chiefly on caribou and moose meat. The Indians have practically no gardens.

June and July are the holiday months and the people of the north certainly holiday in excess. If a rifle shot rings out at the暮 at 9 o'clock in the evening, it is the sign that there will be a dance that night. About half an hour later the 1000 assembles and dance until 1:30 or 2 a.m., when tea is served. Then they go on with the dance again. During the holiday season there is a dance nearly every night at all the posts. The music is supplied by a fiddler and the dances are all of the "square" variety or the jigs and polkas and folk dances peculiar to the district.

His Excellency, Baron Byng, was intensely interested in everything he saw, said Mr. Hutchings. The governor-general said he was making this trip to see the last part of Canada with which he was unacquainted, in deciding a second term as governor-general, Baron Byng has no intention of giving up his efforts on behalf of the Dominion. He wishes merely to enter a wider field and interpret Canada to the people of Great Britain.

The governor-general expressed his intention of exerting his influence to bring about a more direct communication between Canada and Great Britain. The present method is round-about and clumsy, bound as it is with red tape. Instead of the existing means of communication through the secretary of state, Baron Byng wishes to bring about a means whereby the premier of the Dominion can discuss matters of importance with the Prime Minister of Great Britain. This would be one more step toward Canada's complete recognition as a separate part and entity in the British empire.

—Albertan.

An all-day service will be held in the Wetaskiwin church, Sunday, August 16.

Rev. W. Wachlin.

HOSPITAL DONATIONS ARE ACKNOWLEDGED

The matron and staff of the Wetaskiwin Hospital acknowledge with many thanks, receipt of the following donations:

Ladies' Hospital Aid—2 dozen baby diapers, 1 dozen baby dresses, saucepan.

Flowers from the following—Mrs. Wm. Gibson, Mrs. Somers, Dr. Gundesen, Mrs. Williams, Mrs. Peterson and Mr. Wiseman.

Gift to nurses from Mr. C. Maynard, Basket of fruit for nurses from Kenneth Petersen.

Rhubarb from O. G. Rasmussen and Ell Moore.

Letter from Dr. McColligan, Saskatoons from Mrs. Francis McKenna.

All are welcome.

Rev. A. O. Borlaug, B.U.

GETS GOOD PRICE FOR EGGS

The value of eggs in egg production is illustrated in the case of George Dush, of Duhamel, a farmer who has a very fine record for eggs, delivered to C. T. Soland. In a recent shipment of 54 dozen, Mr. Bush had 45½ dozen that graded extra and brought him 27¢ a dozen with four dozen and five that graded No. 1. There were only four dozen that did not get into the top classes. Mr. Bush has a mixed flock, but it is only too evident that it gets first class attention. There are others in Mr. Bush's class, but the grading system shows only too clearly that many farmers are not giving the attention which is necessary if a top price is desired.—Market Examiner.

THREE HOLDUP MEN ARE STILL AT LARGE

Edmonton, July 31.—The three men who succeeded in turning Portage avenue into a down-town district seem somewhat alike to Chicago last Wednesday evening, have not as yet been arrested by the police. Their get-away has apparently been made.

No authentic description of the men was given by any of the persons who were held up and it has been anything but easy for the police to ascertain who they might be.

A suspect was lodged in jail over the weekend but he has failed to give the police any information regarding the hold-up, although it is claimed that he knew of the intended robberies. He has steadily refused to give out any information that might give the police a clue as to who the men taking part in the three holdups were.

BIG SHIPMENT OF ALBERTA BUTTER FOR BRITISH ISLES

Vancouver, B.C., Aug. 3.—Six thousand boxes of Alberta butter, aggregating 11 tons, the largest shipment to leave Vancouver at one time, is being loaded on the Canadian Government Merchant Marine steamer, *Freighter for Great Britain*.

ANOTHER CHURCH UNION

There will take place this fall a union of the Evangelical Protestant churches of America with the Congregational churches of the United States—that is, if the recommendation to be brought before the National Council at its meeting in Washington, is accepted, and there is little fear of the slightest opposition. This denomination is not large, the communicant membership being about 10,000. The churches are principally in the vicinity of Pittsburgh, and the vicinity of Cincinnati, where the Congregational churches are few. Dr. C. E. Burton, secretary of the Congregational National Council, points out that the Evangelical churches have chosen a step which might well serve as an example to many other smaller denominations in the seeking of organic union with some larger body of similar policy. There are at present about 6,000 Congregational churches in the United States with a membership of approximately \$30,000. The denomination has ten theological schools and forty colleges and seminaries.—EX

Provincial Weekly News Bulletin

Edmonton's Population
A recent census of the city of Edmonton taken by the civic authorities shows a population of 65,378 in comparison to 55,000 in the federal census of 1921.

Alix Farmer Inherits Title
Hon. F. A. H. Eaton, farming near Alix, Alberta, has fallen heir to the title of Lord Cheylesmore, through the death in London last week of his father, Capt. Eaton has been farming near Alix since 1921.

Bee-Keepers Organize

Bee-keepers of central and northern Alberta held a gathering in Edmonton the past week, and made preliminary plans for an organization in this part of the province, to affiliate with a province wide organization. The gathering was addressed by Frank C. Pellett, editor of the American Bee Journal, of Hamilton, Ill., and by R. M. Newton, president of the Manitoba Bee-Keepers' Association. Mr. Pellett made the prediction that in ten years Alberta would be shipping out honey to the world's markets by the carload. He believed that Alberta had more possibilities in this way than almost any other section of Canada or the United States.

Alberta's Freight Rate Case
The province of Alberta will present a united front to the railway commission on the question of freight rates when that body commences its general investigation into the question.

At a conference held in Edmonton last week at the instance of the Alberta government, at which representatives of the boards of trade of Edmonton and Calgary and of other interests were present, general points were decided upon for presentation to the commission. Alberta's counsel in the enquiry will be S. B. Woods, K.C.

The matter of details in regard to equalization of rates generally and the securing of commodity rates suitable to the needs was left in the hands

**ELECTION THIS FALL
CANNOT BE AVOIDED**

Winnipeg, Aug. 1.—A Dominion election this fall cannot be definitely avoided, stated Arthur McNeigh, Conservative leader, upon his arrival in Winnipeg on Thursday. He was welcomed by a large crowd of Conservatives, former members of the house of commons and members of the Manitoba legislature. Mr. McNeigh will confine his western visit to Manitoba, planning to remain in the province until the middle of August.

PARIS, AUG. 2.—Official announcement was made Saturday that French evacuation of the Ruhr is complete; that not a single French soldier remained in the mining and industrial basin after midnight Friday.

The entry of the French forces into the Ruhr took place January 1, 1923. It caused much talk to the end and centre of newspapermen who devoted to the report of the operation designed to bring about payment by Germany of her reparations. The evacuation, which has been going on for the past month, however, has been totally ignored by the French press and unnoticed by the general public.

PARIS, AUG. 2.—Official announcement was made Saturday that French

of a small committee consisting of the chairman, Mr. J. H. Hanna, secretary of the Calgary board of trade; A. Chard, supervisor of traffic for the Alberta government, and Mr. S. B. Woods, counsel for the province of Alberta.

A thorough discussion of the many points at issue took place and an amicable solution reached by the conference in all cases. All interested expressed themselves as well pleased with the results of the meeting.

SHeltering of Pigs FROM THE HOT SUN

Growing pigs, especially white ones, are very liable to sun-scorch if allowed to run in grass or rape without shade. A very effective shade has been provided at the experimental station at Rosthern, Sask., in the following manner.

In the spring of 1917, caragana seed was sown in twelve rows, four feet apart, across the rear of the pig pastures, and fenced to keep all stock out. The ground was kept carefully hoed until 1920, when further work could not be carried on because of the thick root system and the branches, which by this time shaded the ground sufficiently to smother weed growth. In 1919, the plants were thinned to one foot apart and the thinning sold to a nursery at one cent each, which netted \$155. In 1922 the fence was removed, and the pigs allowed to use the shelter. It is in use now for the third season, and affords a very efficient and artistic shelter. Cattle, sheep and horses must be kept away from caragana because they will roll it as much as grass. Mature hogs will also eat it. If pasture is not available,

LAST FRENCH POILU HAS LEFT THE RUHR

Retailers Recommend Tax on Mail Orders

Vancouver, B.C., Aug. 2.—Resolutions condemning the stamp tax on cheques and receipts; protesting against the extra charge made by some manufacturing and wholesalers for boxes and cartage; recommending a tax on mail order business which would be distributed among municipalities concerned, and mending the constitution, were passed by the convention of Retail Merchants' Association of Canada at the afternoon session here Friday.

Spirited discussions took place on the question of the income tax and egg grading regulations.

The question of the income tax was brought up by the Quebec delegation, who pleaded for the association to stand against the tax. It was, however, referred to the Dominion board, which will take action after a survey of the wishes of the individual boards and individual members.

Alberta delegates proposed a resolution to request the government to allow country dealers to buy and sell ungraded eggs, under the consideration that they would grade all eggs for resale. The special committee which had been appointed to deal with this resolution, recommended against it. After discussion, the matter was referred back to the committee and will be brought up again.

Pay up your subscription now!

NO MORE BISON WILL GO NORTH IN THIS SEASON

Wainwright, Aug. 1.—Word was recently received by the parks branch here to the effect that branding operations in connection with the buffalo for the north was to be discontinued, and this information was today added to by the receipt of advices that further shipments to the north were to cease for the present year.

The reason for the change of plans by the interior department has not yet been announced, though in the latter case low water might obviate the need of transportation of the northern waters. One thousand six hundred and thirty-four buffalo have now reached their destination in the Green Slave Lake country.

The Useful Hairpin

It is claimed on good authority that, next to the monkey wrench, a hairpin is a most useful invention. A woman can open a fine time lock hairpin-proof safe with a messy little hairpin.

They use them to scratch their heads, pull their shoes, pick their teeth, punch bugs out of cracks in cake to see if they are sufficiently baked, clean their finger nails, fasten up stirrups, pick out nuts, lift stovetops, fasten on buttons, and a variety of other things.

Nova Scotia has the only large tidal water coil fields on the Atlantic coast of America.

EIGHTH GOVT. CROP REPORT

YIELD IN THE PROVINCE WILL BE REDUCED AS A RESULT OF HOT, DRY WEATHER

Facing the disappointing prospect of harvesting a greatly reduced crop from that at first anticipated, as a result of the ravaging effects of wind and great heat, farmers of southern Alberta are commencing the cutting of their wheat the present week. Cutting operations over all of the southern part of the province will be general within the next week, and in the balance of the province about August 10, which will be from ten days to two weeks earlier than last year. Limited quantities of grain already threshed out bear out indications of the past three weeks that yields will be light over large areas in the south. Some samples seen show unusual shrinkage in the dock.

These last report rains varying in extent have fallen in many districts of the province. These rains came too late to save much of the crop affected by drought in the south-eastern district, but in other districts where the damage done to grain was not so irretrievable, the rains have had the effect of filling out the grain in better degree, so that heavier yields and improved quality will result.

Generally speaking, the light soil areas of the province from south to north will yield very lightly. Reports received by the department the past week indicate yields in these areas varying from 5 to 12 bushels. In the other areas of the province where the grain has been in a better position to carry through the heat and dry weather and to benefit from the later rains, reports indicate the yields will vary from 12 to 25 bushels, with some fields touching 30. It is in the large wheat-growing areas, however, that the greatest damage has been done by the periods of drought, and this will be responsible for reducing the total yield in the province.

The south-east district will experience the lightest yields. The east central district as far north as the northern line of the Canadian National railway at Vermilion, is very patchy. Points along the Goose Lake line report very favorable conditions, and expect a good crop. Other sections of the east central territory report only fair to average conditions.

In the south-western district, fairly good crops are anticipated much heavier than last year in many parts, but still suffering decreased yield as a result of drought. As an example of the damage done even in the best districts by the drought, the statement is quoted from a farmer in the Nanton district, who states that the effect of drought was a loss of ten bushels per acre, with the result that the forty bushel crop they anticipated in his district would be cut to thirty. He states that to drivers along the road the crops look well, but a close inspection reveals the damage done. Hail which comes now is too late to help the fat ripening crops.

In the west central districts north to Edmonton and immediate vicinity, the crops have also suffered somewhat from drought conditions, but the recent rains have been of considerable benefit. In the Peace River country, particularly north of the river, the situation has been much improved by the recent rains there.

It is noted that in practically all districts in the province the grain on spring plowing and stubble have suffered severely, while on reasonably well prepared land will yield fairly well. It is a fact also that the intense heat now prevailing is drying out and ripening the wheat so speedily as to prevent their proper maturing. Consequently this also will have the effect of reducing the yield.

The drought has had a serious effect on pasture and feed crops, and in many districts the pasture, which was very luxuriant in the early part of the season, has failed rapidly. Feed crop prospects have also received a setback, and the predicted yield particularly will not be up to early anticipations. While a general shortage is not looked for, certain districts will be dependent upon others for their supply during the coming winter.

Barley crops are cut in the south, but the yield will not be heavy. Corn, sweet clover and alfalfa have done well in the south.

Harvest labor needs for the province are placed at present at 14,000 by the provincial labor bureau, of which 4,000 will be obtainable within the province, as the policy is to use all available labor within the province.

ONE WAY TO DO IT

Friend:—"What's that big box on the front of your car?"

Motorist:—"That's a camera for taking moving pictures. You see, I go so fast I don't have time to look at the scenery, and so I photograph it as I go along."

FIRST PAYMENT NEW CROP FIXED AT \$1.00 BUSHEL

The Alberta Wheat Pool directors have fixed the initial price to be paid their members for the 1925 crop at \$1 per bushel, basis No. 1 Northern, in store Vancouver, effective on and after July 16, 1925. The initial payment, it will be observed, is just the same as it was for the 1924 crop.

On the straight grades of wheat, payments will be made for follows, and growers should see that they get these figures from the elevator companies, less freight in carload lots, and for "street" wheat.

Carloads "Street" —

The above figures for "street" wheat are based on points that take a freight rate of 22 1/2¢ per 100 pounds. Points that take a higher freight rate, will be paid proportionately less. — Western News.

Northern Canada has a greater area of the pre-Cambrian rock formation, the oldest rocks in the world, especially rich in metals, than all the rest of the world put together.

SENT UP FOR TRIAL

Edmonton, July 30.—Nick Senetcho, charged with manslaughter in connection with the death of Mary Ronko, a motor accident on the Calgary trail on the evening of July 15, was committed for trial on the charge by Magistrate P. C. H. Primrose at the preliminary hearing on Wednesday afternoon.

His worship, in committing Senetcho for trial, said that three points had been adduced in the evidence for the prosecution which warranted his judgment. These were that the man was evidently in an intoxicated condition when the accident occurred which resulted in the child's death; that the car was not in proper working order; and that the accused man on his own testimony had speeded up his car just before the child was struck, in spite of the fact that he had been warned with regard to the question of speed by a sign prominently displayed on the road, and which Senetcho admitted having seen.

DO YOUR BOWELS GET CONSTIPATED?

There is no ailment so common to-day as is constipation, and none more dangerous to bodily health, and one that is only too frequently neglected.

A free action of the bowels every day is what you need to ensure bodily health, and when the bowels are irregular you should remedy the trouble at once.

Keep your bowels regular and working properly by the use of

WINNIPEG'S HISTORICAL MUSEUM

1 and 2—Corners in the Hudson's Bay Company's historical museum at Winnipeg. 3—An old-fashioned turn-spit, on which for many years the roasts were cooked at the H.B.C. port at York Factory. 4—A model of the ship that brought the first H.B.C. adventurers to Canada.

FOR a comparatively young city, Winnipegs has many points of interest. None is more worthy of a visit than the historical museum that has there been established by the Hudson's Bay Company. The great company's history is the history of Canada's West, and no institution better represents the earliest history of that land in the manner that the Hudson's Bay Company has chosen.

The value of museums as an educational institution is now only beginning to be more generally realized. What book or series of books could give so comprehensive, so vivid or so unfortunate a picture of the world's past ages as a few days spent among the exhibits of the Hudson's Bay Company? The idea grows in Canada as educational facilities grow. McGill University has fine museums and the Royal Ontario Museum at Toronto, it will be recalled, is one of the world's finest. Its already splendid buildings, soon to be enlarged, is overcrowded with a wonderful store of historic treasures which visiting scholars from abroad never fail to visit.

The object of the Winnipeg exhibit is to depict by means of reliefs, pictures, documents, models, etc., the history of the Hudson's Bay Company, the fur trade, the two ships, "Eagle" and the "Nonsuch." These ships sailed from Gravesend, on the explorer of the Rockies.

Too Good For Poor Printing

When your printer, with a shrug of his shoulders, says:

"I can't turn out the job at that price,"

Give a little more consideration to his opinion. If he has been your printer for quite a while, and has given you good work, fair service, and charged moderate prices, don't hand over the order to some other printer merely because his estimates appear to save you a few cents.

It may be that your printer has figured on more costly material, extra press work or better typography. The few cents more he wants you to pay may mean the difference between good printing and poor printing.

Talk it over with him. It would be far better to say: "I have so much money to spend. Give me the best job the money will buy." If he is a reliable printer he will do this, or he will tell you that the work cannot be done properly for the expenditure you contemplate.

No good printer can afford to turn out his work at a loss. And if he is a good printer, he will not attempt cheap work, because he knows that the result will not be consistent with his standards. Your printer has a reputation he must maintain; your firm has a standing which should not be lowered by the appearance of your printed matter.

THE CAUSE OF VARIATION IN CREAM TESTS

B.C. DAIRY DEPARTMENT GIVES
INTERESTING FACTS FOR
DAIRYMEN

The dairymen of the dominion who have been perplexed by the variation in their milk or cream tests, may be able to realize the causes, when they read the following article, issued by the dairy branch of the provincial department of agriculture of British Columbia, on the Variation of Butterfat Tests. The article states:

"Why does my test vary?" This is a question that the operator of a dairy plant or cream buying station who purchases cream or milk on the butterfat basis must answer many times during the year. Usually the man who sells cream or milk is seldom familiar with the conditions which cause the cream or milk test to vary, and consequently does not understand why it is that the cream from his herd tested 40 per cent fat one day, while the day previous it tested 35 per cent.

The per cent of butterfat in the milk varies from individual cows.

Some of these variations are due to definite causes, while others are due to causes that no one has been able to explain. A four-day consecutive record of four different cows will give an idea of what may be expected in the variation of the test of milk from individual animals.

The test from Cow No. 1 varied from 3.6 to 4.1 per cent fat in the four days, making the greatest variation of five-tenths of 1 per cent for this time. Cow No. 2 did not vary so much, although she was in the same herd and milked the same way. Milk from Cow No. 3 varied from 3.3 to 3.6 per cent making the greatest variation of six-tenths of 1 per cent for this time. Cow No. 4 tested from 3.5 to 4.2 per cent fat, with the greatest variation in the four milkings amounting to seven-tenths of 1 per cent.

It is often thought that the richness of the milk varies with the feed of the cows, but so far no ordinary dairymen is concerned that is not true. There is no way known of feeding a cow with milk averages 4 per cent fat for a year to make her milk average 15 per cent. In the investigational work at Purdon, it has often been found necessary to weigh and test the milk for butterfat of the complete milking from one entire herd as it is delivered to the milk plant or station. This usually includes night and morning milkings. Each can is weighed and tested separately, the butterfat figured and the average test determined by dividing the total pounds of milk into the total pounds of butterfat and multiplying by 100.

The milk from two separate herds was tested in 15 days, and in the first herd the fat test varied in that period from 4.3 to 5.2, while in the second herd it ranged from 3.7 to 4.4.

This is a fair example of the variation that one may expect from day to day if the milk is tested daily from a herd of five or six cows. In some cases the per cent of fat variation in the milk from a herd as it is usually delivered to the plant or station may be due to several other things than in the variation of the per cent of fat in the milk from individual cows, such as cream or skim milk being used for home, skim milk or cream, after separating a portion of the milk for home use, being poured back into the milk. As a general thing, however, the average variation of a herd of cows is very similar to the variation in the test of the milk from the individual cow.

The per cent of fat in the cream separated by the centrifugal separator may be affected by one or more of the following conditions:

1. Inflow—The inflow of milk into the separator bowl is controlled to a large extent by a device known as the "float." The greater the inflow of milk into the separator bowl, the thinner the cream.
2. Speed of Separator—It is very difficult to turn a separator at the same rate of speed from day to day unless one turns himself occasionally to make sure he is turning at the proper speed. The greater the speed the thicker the cream.
3. Flushing the Separator bowl—The more water or skim milk used in flushing the separator bowl, the thinner the cream.
4. Butterfat test of milk—Many people believe that they can set the cream screw on their separator at a certain point and it will skim a definite per centage of cream if it is run at the proper speed. This would only be true when the inflow of milk in the separator, the temperature, speed of bowl, the richness of cream remains the same.

Those who sell cream should determine in such a condition that it will be clean and free from lumps. Lumpy cream makes it impossible to get an accurate sample for testing. This condition of cream can be avoided.

ALIX FARMER IS NEW LORD CHEYLESMORE

London, July 31.—Major General Lord Cheylesmore died yesterday, following injuries he sustained in an automobile accident. He was a crack shot and sportsman of prominence.

Lord Cheylesmore was seriously injured June 19, when he was thrown from his motor car by an accident which occurred near Windsor Castle. Lord Cheylesmore was born January 25, 1848, and after attending Eton entered the army. He was stationed in Bermuda for a period commencing in 1890. He owned the manor of Cheylesmore, formerly a possession of the Duke of Brine.

Lord Cheylesmore's heir, Captain, the Hon. Francis Ormonde Henry Talon has been living in Alberta since 1921, and is farming two sections of land at the Happy Valley ranch near Alex. He spends most of his time in summer at his ranch but winters generally in the south of France.

The new Lord Cheylesmore served with distinction in the great war, being awarded the D.S.O. for gallantry when with the Grenadier Guards, which famous regiment he joined from Cambridge in August, 1914. He served in France with his battalion from 1914 to 1917, and was severely wounded.

On being placed on the ration list after the war he came to Alberta and took up farmland.

MILLET

The Millet U.F.W.A. held their July meeting at the home of Mrs. H. G. Young, on Wednesday, the 22nd, with 13 members and 9 visitors present. The meeting opened with community singing and roll call was answered with a recipe for "cake filling or cake filling." The business part of the meeting over, there followed a varied program. Miss K. Scherff gave her very interesting report on "University Week" as delegate from the Wile Aweise Junior U.F.A. Four Hillside members provided some music and the president, read. Mrs. Parry's report on Education which gave rise to some animated discussion, as it was found there were six school teachers present and one just starting out on her career. The meeting closed with community singing, and all enjoyed an excellent lunch.

The next meeting will be held at the home of Mrs. Cottrell on Wednesday, August 19th. Every body is welcome.

Look at the label on your paper. Eat by cooling cream immediately after separating and by pouring warm cream into cool cream, and by stirring often.

ALBERTA'S LIST OF RECOMMENDATIONS

DECISION REACHED AT FREIGHT RATES CONFERENCE FOR ALL- ALBERTA CASE

Edmonton, Aug. 1.—Decision was reached at a freight rates conference for all-Alberta rates case before the railway board, and complete unanimity among Alberta interests will be sought, so that a uniform rate may be presented.

The conference agreed upon a specific list of recommendations which should form the basis of Alberta's case. Representatives of the provincial government, the city of Edmonton, various boards of trade, the U.F.A. and other organizations were present. Sydney B. Woods, K.C., has been retained by the provincial government as counsel for the provincial government in the impending rates case.

Briefly summarized, the recommendations adopted during the session for inclusion in Alberta's freight rates case are:

1. One standard mileage freight class rate tariff, applicable, so far as possible to all points in Canada, having due regard to such distributing centres as are already established.

2. Continuation of special distributing centres as are already established.

3. Continuation of special distributing tariffs, restricted in their application to traffic from recognized distributing centres.

4. Disallowance of tolls, which for the movement of similar commodities over the same line or route, under substantially similar circumstances and conditions, provide for a high rate for a shorter than for a longer haul, and without restriction of the generality of the foregoing, the establishment of rates, and mileage with the rates now in effect from said points to Fort William and Port Arthur.

5. Reduction of domestic rates on low grade and coarse grains to Vancouver and Prince Rupert to a basis which would permit the development of a market for such Alberta grains at the coast.

6. Lower commodity rates on 50,000 pound minimum cars of butter shipped to Montreal for export purposes, and a more favorable export rate on butter shipped via Pacific coast ports.

By unanimous vote, the freight rates memorandum submitted by the Edmonton Board of Trade was adopted as the basis of discussion, and the recommendations thereto contained thus far have been, with a few alterations, approved.

98 ARE NOMINATED:
TO CONTEST 48 SEATS

Frederiction, N.B., Aug. 4.—Ninety-eight candidates were nominated yesterday for the forty-eight seats in the next New Brunswick legislature, the members of which will be elected when the people of New Brunswick go to the polls on Monday, August 19. Nomination proceedings were held at the shire towns of the 15 counties of the province and also at the four urban constituencies, two of which have been constituted since the last general provincial elections.

BRITISH MINERS' STRIKE SETTLED

London, July 31.—The crisis in the coal industry which threatened a strike of the miners beginning at midnight tonight has been settled. Announcement of the settlement was made shortly before 4 o'clock this afternoon.

Owners of the coal mines have withdrawn for a fortnight notice of the expiration of the present working agreement, and thus the strike has been averted.

The owners' decision announced this morning will permit the necessary discussions to discover in what way in which the temporary assistance offered to the mining industry by the government can be given.

When, at an early hour this morning, it was announced that the government had determined to organize a most complete inquiry into the mining industry and give it financial help until next spring, it was felt that the perils of the miners' strike had undergone a dramatic change with every hope that the threatened stoppage of work in the mines would be averted.

SHIP TWO COWS TO
GREAT SLAVE LAKE

Edmonton, Aug. 4.—Two extraordinary animals are being shipped north to the Great Slave Lake on Tuesday by the Alberta and Arctic Transportation Company of Edmonton. Their destination is the Anglican mission at Hay River Harbor on the huge northern water, and their like has never before been visualized by the natives who string their trap lines to the Cariboo Hills. The animals are cows, and unless they are assassinated by the husky dogs, their mission in life will be to supply the lactic fluid for the Eskimo and Indian children who are learning the three "R's" at Hay River Harbor.

After leaving the train at Waterways, they will go north by the A. and Arctic line steamers to their destination, and on arrival will present the authorities of the mission with two more bovine species.

On the same A. & G.W. train the Alberta and Arctic company is sending out four horses for the government of the Northwest Territories at Fort Smith. These animals will be used by the buffalo rangers in the Wood Bison park, while observing the movements of the recent importations of Walrus, which are now browsing on the red top grasses of the 10,000 square mile reserve.

Phone, mail, or hand in your news items to The Times Office. Phone 27. The ads are your invitation to the stores of aggressive and successful business men.

IMPORTANCE SALT IN THE ANIMAL SYSTEM

GOVERNMENT MILK TESTER ADVOCATES GRANULAR SALT FOR DAIRY ANIMALS

"In my visits to the different farms in connection with milk testing, I have observed some farmers or dairymen using rock salt instead of granular salt for their stock. Rock salt is better than meat salt at all, but is inadequate for a milking animal. Salt is very necessary for the digestion of food. It is needed continuously for the production of hydrochloric acid in the stomach to carry on digestion.

Feeding granular salt once or twice a week is not enough. It should be in reach of the animal at all times, and in the case of the high producing animal should be mixed with the feed at the rate of one pound of salt to 100 pounds of the grain feed. The cow being fed grain according to her production, is served with extra salt in the extra grain feed to digest this extra food consumed by the higher producing animal.

"The average dairy cow requires 1½ to 2½ ounces of salt daily or about 25 pounds a year. How long will it take a cow to lick 25 pounds of rock salt?

"The cows of Alberta received the necessary salt and water, to say nothing of extra feed balanced rations, I believe their production would increase five per cent. In an experiment, a cow was deprived of salt for five days, and she decreased two per cent in quantity of milk, and seven per cent in butterfat produced.

"When I see a promising looking dairy cow standing in the hot sun licking at rock salt, trying to get enough of it to help fill her mission in the world, I feel sorry for her. In fact, if she were my cow, I could hardly look her in the face.

"There are quite a number of really good cows in the country. There are some tests that I do not feel like putting into print.

"Find out what each cow is doing by testing her milk. The testing costs you nothing. It is one case in life where the farmer gets something for nothing."

The above article is by J.H. Cook, who is the milk tester for Millet, Wetaskiwin, St. Albert and Hay River districts.

COURT OF REVISION

The city council met as a court of revision on Thursday last and disposed of the forty-six appeals against the assessment. Very few reductions or adjustments were made. Mr. Pannier of Red Deer, who valued the buildings last year, was present and assisted the council in their deliberations.
